Re: Notice of Infringement of BlackBerry Patents; Offer to License

Dear General Counsel:

BlackBerry Corporation is a pioneer in the fields of mobile communications, unified endpoint management, and end-to-end mobile security among others. The quality and breadth of its portfolio of about 37,500 patents and patent applications is a testament to its numerous innovations and contributions. I represent BlackBerry in its efforts to license its patent portfolio.

BlackBerry believes that MobileIron, Inc. (together with its affiliates and subsidiaries) infringes numerous BlackBerry patents by making, using, importing, selling, and/or offering to sell MobileIron products in or into the United States as detailed in the body of this letter.

BlackBerry offers MobileIron the opportunity to license one or more of these patents as well as its portfolio. If MobileIron is interested in discussing such a license, BlackBerry would like to arrange a meeting at your office in Mountain View, CA during **the week of September 9, 2019**, to discuss this matter in greater detail.

At that time, we would hope to reach agreement with you on an overall process and timetable for concluding such a license. We would also be prepared to (1) explain in greater detail the basis for our belief that MobileIron is infringing many of BlackBerry's patents, including presenting claim charts mapping claims of the patents to MobileIron products, and (2) present a specific, written offer for a license, including the amount of a royalty.
